REMARKS

25X1X

Drewitz airfield was unoccupied on 2 September 1951. The landing field was covered with high grass. No construction work was observed. The low wooden buildings north of the field, which had been occupied by refugees, were partly evacuated recently as the field was allegedly to be improved. However, local residents have not noticed any indications of construction work at the field to date. \*

25X1C

- \* **Comment.** The planned improvement of the airfield was reported several times. Surveying was observed at the field in early July 1951. It is believed that construction work will not be started prior to the completion of Welzow airfield.
